

PathLight Shines Brightly

Empowering impoverished children in Belize to receive a quality education, break free from poverty, and reach their God-given potential is the vision of PathLight International. Founded in 2007, PathLight engages two complementary programs, Beacon and Education+, to achieve success.

Beacon is a community of donors on a mission to provide the entire nation of Belize with access to quality education. It employs multiple Teacher Training opportunities to help equip teachers and transform classrooms. This training includes year-round workshops with onsite support and mentoring. Resource centers, literacy and numeracy interventions, and summer teacher training conferences are also available. These activities have the full endorsement of the Ministry of Education in Belize. Beacon impacts student outcomes country-wide.

Education+ rescues children from poverty by providing access to quality education, exceptional mentoring, and life-changing transformational experiences. E+ provides access to tuition, supplies (uniforms, books, and hot lunches), tutoring, and transportation. Mentoring enables students to experience discipleship and Christian character formation.

Transformation occurs through leadership development, life & social skills coaching, and job-readiness training. This faith-centered after-school program empowers students to break free from poverty and reach their God-given potential. Developing future leaders is Education+.

In some respect, PathLight is beginning despite its success. There are more impoverished children waiting for access to secondary school. The problem is education is not affordable for many, and their future ends before it begins. PathLight is solving this problem. Each year students who show potential join its program Education+. This, coupled with Beacon, makes an impact on students and teachers and is good news for Belize. PathLight's message of hope shines as their education+ ends poverty.
